CLEANCART CAR WASH

Cleancart car wash is a Green product specialized in the latest technology of waterless car washing services in India. This concept is developed for the car owners while using idle parking time at shopping mall, Govt. organizations, villas & apartments, parking areas, during their daily activities. Waterless car wash is a revolutionary new idea for 21st century vehicle owners. Cleancart Carwash brings affordable luxury car wash service to you.

Cleancart car wash brings you services that your car needs including washing and polishing. We are specialized in the waterless technology for cleaning vehicles, all the products are 100% environment safe. Our services ensure the treated vehicle surfaces to stay clean longer. The anti-static properties bounce that dirt and remain a layer on car surface. This will result in less cleaning per vehicle, per month and therefore saving time, effort and money whilst give Our aim is to provide car wash service to our customers to make their life easier. We offer quality and value for money with our innovative services giving our customers more time to enjoy their pleasurable pursuits.

Our customer can be confident, because we have professionally trained and reliable devoted team. Our professional staff provides the utmost respect and care for our customers and their vehicles, ensuring maximum service at minimum cost. We treat your car as if it were our own! we save your time, money, fuel and water !! with each wash, you are not only clean cleaning your car but you are polishing and protecting it every time.

HOW DO WE WORK

It is bio-degradable cleaning formula to minimize the quantity Of water, energy and Will keep the premises neat, tidy and ecofriendly, We use very high quality shampoo to be mixed with water in order to applying directly to washing without even drop of water on the floor, unlike the traditional washing. It is a process of washing with minimum water.

ECO FRIENDLY

The cleancart washing cart contains biodegradable products that are not harmful to the environment. It saves water by using a minimal 1 5 liters of liquid instead of 200 liters used in conventional car washing system The specially formulated wash product is sprayed onto the vehicle. This lifts and encapsulates dirt on the vehicle. The encapsulated dirt is then gently wiped with a chamois leather without scratching the vehicle, and the vehicle is then buffed with a microfiber cloth to give a beautiful shine

METHODOLOGY

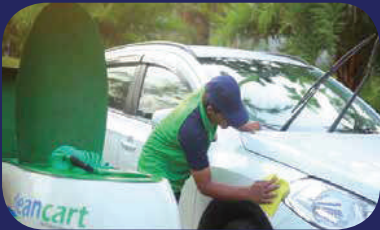

Step 1: The operator uses a soft duster to take the drift off from the car that needs to be cleaned

Step 2: The specially formulated wash product is sprayed on the vehicle

Step 3: The operator uses a chamois leather to clean the premixed shampoo solution and dirt from the car body

Step 4: A microfiber cloth is used to dry the water from the car body and wind screen

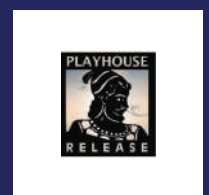

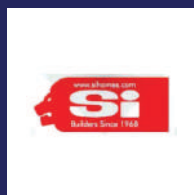

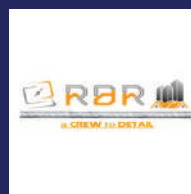

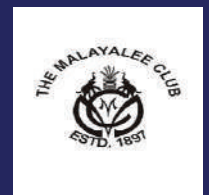

Step 5: Finally non-bio hazardous polish is used to clean tyres

FEATURES

- Made in German Technology
- Light Weight
- Futuristic Designing
- Non-Marking wheels
- Environment friendly
- Zero percent water spillage on ground
